8th grade science fair projects tend to involve the scientific method and designing an experiment and not making models or explaining processes. You'll be expected to present data in the form of tables and graphs. Typed reports and posters are the norm (sorry, no handwritten text). You should do the project yourself, rather than enlist heavy-duty help from a parent or older student.

important time to a worthy piece of research. This edited collection provides real and outstanding examples of multiple research design methodologies which will allow doctoral researchers to develop a wide set of research skills, leading to the development of a high-quality academic thesis from which peer reviewed research papers and books can emerge. Each main chapter presents the summary of a doctoral thesis, followed by focused aspects from the projects where the contributors highlight the development of a research design, the process involved in executing the design, and present selected findings with their implications. Each chapter concludes with the researchers' experiences of learning through this journey and the implications of the process for the development of the discipline and their own career. Ideal reading for doctoral students and supervisors, this book is a source of encouragement and motivation for new researchers seeking

to challenge general perceptions in the social sciences that PhD or other doctoral research projects must be small-scale rather trivial studies, but can instead produce robust findings that have real-world implications.

Current research increasingly highlights the role of early literacy in young children's development--and facilitates the growth of practices and policies that promote success among diverse learners. The Handbook of Early Literacy Research presents cutting-edge knowledge on all aspects of literacy learning in the preschool years. Volume 1 covers such essential topics as major theories of early literacy; writing development; understanding learning disabilities, including early intervention approaches; cultural and socioeconomic contexts of literacy development; and tutoring programs and other

Indian-American community, and triggers stress for many Asian Indian students. This volume examines second generation (America-born) and 1.5 generation (foreign-born) Asian Indians as they try to balance peer culture, home life and academics. It explores how, through the acculturation process, these children either take advantage of this positive stereotype or refute their stereotyped ethnic image and move to downward mobility. Focusing on migrant experiences of the Indian diasporas in the United States, this volume brings attention to highly motivated Asian Indian students who are overlooked because of their cultural dispositions and outlooks on schooling, and those students who are more likely to underachieve. It highlights the assimilation of Asian Indian students in mainstream society and their understandings of Americanization, social inequality, diversity and multiculturalism.
