"It takes a different kind of thinking to solve a problem than the kind of thinking that produced the problem." -Albert Einstein

JJ HAD A DEVASTATING PROBLEM. At age fifty-one, he was diagnosed with stage four cancer and given three years to live. Rather than accept that outcome, JJ did what he always does: he set out to find a solution. Desiring to look beyond traditional treatments and their often harmful side effects, he put his unconventionally wired mind to work. JJ was relentless as he investigated alternative therapies and pursued global trailblazers in cancer research. Moving from the role of patient to patient-researcher, he became a trailblazer in his own right, being sought after for his latest findings. Ultimately, JJ brought together the most innovative international minds at

the Rethinking Cancer 2017 conference in Paris. Together, they found common ground, and they continue to create integrative, synergistic approaches to treatment. Today, almost a decade after his diagnosis, JJ has defied the odds and is cancer-free. Recently retired from his career as a commercial airline captain on the Airbus A380, he now devotes himself to sharing his ongoing research with scientists and patients. JJ's story illustrates how looking at things differently often enables us to see them in a whole new light. "Captain Trochon is a true warrior, willing to fight like no other to win his battle against cancer." -Prof. Valter Longo, Director of USC Longevity Institute, Los Angeles

journey will be an exciting and rewarding one, resulting in the birth of a healthy baby. When those dreams are shattered because they cannot conceive or miscarry, they ask, "Why me? What did I do wrong?" The trauma of infertility is as devastating to one's self-esteem as any other life crisis, it can destroy intimate relationships or it can bring out the best in us. In her book, *Creating Life Against the Odds*, Dr. Higgins, an obstetrician/gynecologist, describes her own experience becoming a mother by ovum donation. She also shares the first hand accounts of dozens of others who have turned to assisted reproductive technology (ART) in order to realize their dreams of becoming parents. These are stories Dr. Higgins has heard from her patients and from hundreds of women (and men) she has counseled or communicated with through confidential Internet support

groups. The stories of these courageous individuals became the inspiration for *Creating Life Against the Odds*. Dr. Higgins takes us along on their journeys as they struggle with infertility, as they explore the options that medical science now offers, as they meet obstacles, and as they adjust to repeated loss. She also takes us into the minds and hearts of sperm and ovum donors, surrogates, and gestational carriers, looking at what makes them want to lend such an intimate, helping hand. Are they like organ donors? Do they do it for financial gain? When ART enters the picture and donors or surrogates are used, how should we describe their relationship to the children they helped create? And what about the children? Are they like adoptees? How do they understand their birth origins? And what should their parents tell them? Dr. Higgins' wisdom as a well-traveled physician, who has

delivered babies and counseled patients from many cultures, allows her to tackle tough practical and ethical questions from a global perspective. These questions are answered honestly, with deep compassion and respect for those courageous men and women who have sought the help of ART and who belong, as a result, to a special group of parents whose success in family-building is due to an extraordinary commitment and a selfless expression of love.

This heartfelt book is a powerful and practical guide for parents and educators of autistic children. It is filled with resources and first-hand experiences to equip you with the skills to help your child flourish in today's world.

consuming? .Against All Odds is one man's story of hope and determination to rise from poverty and create the life of his dreams.

Huseyin M Bekirov was born in the remote Balkan Village of Prolaz, Bulgaria in 1935. In 1944 Bulgaria was invaded and occupied by the soviet army. Following this, partisans came down from the mountains and with the help of the KGB established a government modelled after the Soviet system. After many killings, jailing and expropriation of properties and farm land, things somewhat settle down. Big promises were made. Indeed, initially they provided free education, full employment and free health care. This

initial enthusiasm of communism in Bulgaria evaporated after the fallacy of the communist system became clear, making many patriotic Bulgarians (like ourselves) leave their country. In 1966 we were sent to serve as physicians in Ethiopia, Africa. After five years of service in Ethiopia, where we lived in a feudal system, we were able to emigrate to the USA. Passing through three continents and living under the Bulgarian Communism and Ethiopian Feudalism, we settled in US Capitalism. All along our journey we encountered life treating dangers but succeeded against all odds.

When Kiki's father goes missing during his volunteer work as a doctor in a war zone, she does what she thinks she must to improve the odds of his coming home.

scientist who discovered one of the most important chapters in our history." "Sean B. Carroll Big History, the field that integrates traditional historical scholarship with scientific insights to study the full sweep of our universe, has so far been the domain of historians. Famed geologist Walter Alvarez—best known for the "Impact Theory" explaining dinosaur extinction—has instead championed a science-first approach to Big History. Here he wields his unique expertise to give us a new appreciation for the incredible occurrences—from the Big Bang to the formation of supercontinents, the dawn of the Bronze Age, and beyond—that have led to our improbable place in the universe.

Life in inner Sydney in the 40's and 50's is a far cry from the trendy suburbs we know today. Jack Stewart excels in his studies and in spite of his humble beginnings
