This book is about the central figure of our contemporary, ‘ liquid modern ’ times – the man or woman with no bonds, and particularly with none of the fixed or durable bonds that would allow the effort of self-definition and self-assertion to come to a rest. Having no permanent bonds, the denizen of our liquid modern society must tie whatever bonds they can to engage with others, using their own wits, skill and dedication. But none of these bonds are guaranteed to last. Moreover, they must be tied loosely so that they can be untied again, quickly and as effortlessly as possible, when circumstances change – as they surely will in our liquid modern society, over and over again. The uncanny frailty of human bonds, the feeling of insecurity that frailty inspires, and the conflicting desires to tighten the bonds yet keep them loose, are the principal themes of this important new book by Zygmunt Bauman, one of the most original and influential social thinkers of our time. It will be of great interest to students and scholars in sociology and in the social sciences and humanities generally, and it will appeal to anyone interested in the changing nature of human relationships.

This classic work of constitutional theory analyzes the general structure of constitutional rights and their judicial application. It deals with a wide range of problems common to all systems of constitutional rights review - from balancing rights to deciding the limits of their scope.

This innovative book proposes new theories on how the legal system can be made more comprehensible, usable and empowering for people through the use of design principles. Utilising key case studies and providing real-world examples of legal innovation, the book moves beyond discussion to action. It offers a rich set of examples, demonstrating how various design methods, including information, service, product and policy design, can be leveraged within research and practice.

Nutrition for Developing Countries is both a textbook of nutrition - covering the essential facts about nutrients, nutrient needs, foods, and meals - and at the same time a practical guide for nutrition workers - be they health workers, agricultural workers, home economists, or school teachers - or their trainers. It explains in clear simple language, and practical detail, how nutrition workers can help families with nutrition problems, how to treat malnourished children, and how to work in communities, and in schools. This information is not easily available elsewhere, and no other manual covers the subject so comprehensively. The manual is liberally illustrated, with many new drawings, as well as some from the old edition of the book. This new edition of a popular and widely-used book brings the subject up-to-date, and takes it to a slightly more advanced level, and includes new ideas on working in and with communities, and about nutrition education. It includes many ideas for exercises for training nutrition workers. Nutrition for Developing Countries fills the role of the first edition, and retains its simple approach, but covers the subject in greater depth and more widely.

Reconstructed from lecture notes of his students, these are the best records of the theories of Ferdinand De Saussure, the Swiss linguist whose theories of language are acknowledged as a primary source of the twentieth century movement known as Structuralism.

The powerful true-life story of a Brazilian boy who could have been a fisherman but instead became the biggest professional killer known to the world--soon to be a major motion picture. Julio Santana as seen through the eyes of acclaimed investigative reporter Klester Cavalcanti is not a monster--he is a loyal son, a family man, a devout Christian who is tormented by his conscience with every shot. But in a cruel and lawless area of Brazil, where every life has its price, respect for life is a luxury that he can't afford. Trained by his uncle, an assassin, and initiated in murder at 17 years of age, Santana proved to be a natural. Without moralizing about mass murder, *The Name of Death* attempts to show how such a career can be not so very different from other ordinary working lives. The portrait that emerges in this riveting narrative, based on seven years of phone conversations between Cavalcanti and Santana, is not only that of a man but also that of a country. Describing in detail only a handful of the almost 500 murders Santana carried out, Cavalcanti reveals just how lawless much of the interior of Brazil has been for the past 50 years. The state, the police, and the security forces play almost no part in establishing the rule of law--except when they are suppressing the guerrilla threat of the early 1970s. Cavalcanti shows just how easy it is for a boy like Julio to take the law into his own hands, and what a wild place Brazil has been and in many ways continues to be. *The Name of Death* is being adapted into a major motion picture produced by Fernando Meirelles (director of *City of God*, *Blindness*, and *The Constant Gardener*) and Globo Filmes, for release in Brazil in July 2017 and distribution in the U.S. the following year.

Infrastructure is a fundamental driver of economic growth and social development. Yet, unmet investment needs coexist with white elephants and bridges to nowhere, while major construction projects face huge cost overruns and citizen protest. The governance of infrastructure is already complex, involving a wide array of stakeholders and strategies. Drawing on novel survey data and case studies from around the world, *The Governance Report 2016* examines the capacity of public administration to manage infrastructure investments, highlights governance innovations, and provides guidance for public governance of infrastructure. The Report offers information, analysis, and tools for policymakers, practitioners, and academics interested in infrastructure and other large-scale projects.

“ Highly entertaining. ” —Adam Gopnik, *The New Yorker* “ Funny, curious, erudite, and full of useful details about ancient techniques of training memory. ” —*The Boston Globe* The blockbuster phenomenon that charts an amazing journey of the mind while revolutionizing our concept of memory An instant bestseller that is poised to become a classic, *Moonwalking with Einstein* recounts Joshua Foer's yearlong quest to improve his memory under the tutelage of top "mental athletes." He draws on cutting-edge research, a surprising cultural history of remembering, and venerable tricks of the mentalist's trade to transform our understanding of human memory. From the United States Memory Championship to deep within the author's own mind, this is an electrifying work of journalism that reminds us that, in every way that matters, we are the sum of our memories.
