About the Book: Manufacturing process has become important in the industrial environment to produce products for the service of mankind. The basic need is to provide theoretical and practical knowledge of manufacturing processes to all the engineering students. This book covers most of the syllabus of manufacturing processes for engineering classes prescribed by UPTU. At the end of each chapter, a number of questions have been provided for testing the students understanding about the concept of the subject. The whole text has been organized in 10 chapters. The first chapter presents the br.

Suitable for a student taking a course in Electronics for the first time, this title explains 'what electronics is', 'what are its applications in our day-to-day life', 'what components are used in electronic circuits', 'Future trends in electronics', and more.

Indian Railways is popularly known as the lifeline of the common man. It holds the pride of being the largest railway network

all over the world. In recent years, the government has collaborated with many technical and scientific agencies to provide safer, more comfortable, and more efficient services to its customers. Well, this has led to the immense growth and achievement of the Railway sector including embedded systems, security cameras, fog vision technologies, and solar heat engines, etc. Besides, the Indian Railways stands as one of the largest employers in the nation. Recruitment to this sector is made by the Railway Recruitment Board (RRB).
