An illustrated quarterly.

Since their discovery a century ago, the Dunhuang manuscripts have revolutionized the study of Asian religions. Until recently, however, the rich materials relating to esoteric tantric Buddhism have been largely ignored. This volume provides an indispensable doorway into these materials. An introduction summarizes the discovery, worldwide dissemination and general character of these Tibetan treasures. The catalogue entries provide introductory discussions of the manuscripts' contents, in addition to reordering the often scrambled folios, linking them to their long-lost counterparts in other collections, and matching them with corresponding texts in the Tibetan canon. The catalogue includes indices to Tibetan and Sanskrit titles, names and terms, as well as all Pelliot manuscripts referenced. The result is an invaluable resource for scholars of Buddhism.

The Truck and Coach curriculum (T&C) level 3 has been developed in keeping with the prescribed Ministry of Training, Colleges and Universities (MTCU) Training Standards, which apply to the Truck and Coach Technician apprenticeship. The curriculum layout used provides an opportunity to cross-reference the in-school learning outcomes and content to the specific workplace Training Standards. For easy reference, a time allocation has been included for each reportable subject along with the Theory/Practical breakdown for the delivery of the Learning Content. More detailed time allocations for the instructor have been provided for each topic area to ensure consistency for each appropriate intake. The reportable subjects are Trade Practices and Auxillary Systems; Engine Systems; Electricity and Electronics; Fuel Systems; Vehicle Electronic Management and Emission Systems; Drive Trains; and Steering, Suspension and Break Systems.--Includes text from document.
