Starfish Retrospective - TeamRetro

Starfish (or sea stars) are beautiful marine animals found in a variety of colors, shapes, and sizes. All starfish resemble stars, and though the most common have only five arms, some of these animals can grow up to 40 arms. The amazing sea creatures—part of a group of animals known as echinoderms—travel using their tube feet.

12 Surprising Facts About Starfish - ThoughtCo

Your safety and wellbeing on a Starfish Course are paramount and we owe it to you to take care of you – that is what we do and that's why we had to make these decisions. Statement about Coronavirus (COVID-19): We are in challenging times. The starfish retrospective is a great way to learn about the opinions and concerns of the employees in a cost-effective manner. A starfish diagram is a star-shaped figure that has one of the above mentioned headings in each of its arms. Once a diagram is made, employees can be asked to fill in these arms according to the instructions.

FunRetro | Starfish retrospective (Keep doing, less of ...

Most starfish release eggs and sperm into the open water, where fertilization occurs. Larvae then drift freely in the sea as plankton allowing

wide dispersal. One of the most beautiful and interesting larvae is that of the seven armed starfish, which resembles a shooting star. When ready to settle, the larvae split into two sections.
