A collection of housing designs built over the last hundred years, illustrating innovative approaches. Fourth in the Key series, with newly drawn plans suitable for study in architecture schools, this volume will appeal to students of urban design and planning as well as architecture. Key developments covered include early apartment blocks, the projects of European modernism, high-rise and large-scale schemes, and postmodernism. Exterior and interior photographs show materials, massing, and context. 150 color photographs, 500 line drawings.

The only history and theory textbook to include accessible extracts from a wide range of historical writing. Provides a comprehensive introduction to the theorists who have

most influenced twentieth-century historians. Chapters follow a consistent structure, putting difficult ideas into an accessible context. This is the only critical reader aimed at the undergraduate market.

Here are 32 notable examples of multi-family housing from many countries, selected for their importance as prototypes. Designed by such masters as Frank Lloyd Wright, Le Corbusier, Mies van der Rohe, and Alvar Aalto, the buildings are illustrated with photographs, site plans, floor plans, elevations, and striking axonometric drawings.

This collection features 30 exceptional, but very different residences, including Fallingwater and Dana House by Frank Lloyd Wright;

Hill House by Charles Rennie Mackintosh; Villa Savoye by Le Corbusier; Villa Mairea by Alvaro Siza; Villa Karma by Adolf Loos; and the Rachofsky House by Richard Meier. Each profile includes numerous photos of interior

The main driver of inequality—returns on capital that exceed the rate of economic growth—is again threatening to generate extreme discontent and undermine democratic values. Thomas Piketty's findings in this ambitious, original, rigorous work will transform debate and set the agenda for the next generation of thought about wealth and inequality.

This text is an essay on the relationship between ways of thinking, the rich seams of

contemporary thought and the forms of the house, of planning and living in it. The descriptive method is based on seven guided visits to a group of real or imaginary houses that make up a sufficiently extended panorama for understanding what the 20th century has bequeathed to us in the way of a heritage. In order to choose the houses to visit it was necessary to narrow things down, simplify them, by highlighting a series of archetypes defined by their most pronounced features. The reader, then, won't find any of the masterworks built by modern architects -neither the Villa Savoye, nor Fallingwater, nor the Villa Tugendhat-but mostly imaginary houses, houses constructed by manipulating different references. In short, this book invites the reader on a fantasy tour, one whose aim is not just

to celebrate the diversity of the 20th-century house but also to stimulate the pleasure of thinking, planning and living intensely, to promote the appearance of a house that does not yet exist.

On Melbenan Drive just west of Atlanta, sunlight falls onto a long row of well-kept lawns. Two dozen homes line the street; behind them wooden decks and living-room windows open onto vast woodland properties. Residents returning from their jobs steer SUVs into long driveways and emerge from their automobiles. They walk to the front doors of their houses past sculptured bushes and flowers in bloom. For most people, this cozy image of suburbia does not immediately evoke images of African Americans. But as this pioneering

work demonstrates, the suburbs have provided a home to black residents in increasing numbers for the past hundred years—in the last two decades alone, the numbers have nearly doubled to just under twelve million. Places of Their Own begins a hundred years ago, painting an austere portrait of the conditions that early black residents found in isolated, poor suburbs. Andrew Wiese insists, however, that they moved there by choice, withstanding racism and poverty through efforts to shape the landscape to their own needs. Turning then to the 1950s, Wiese illuminates key differences between black suburbanization in the North and South. He considers how African Americans in the South bargained for separate areas where they could develop their own neighborhoods,

While many of their northern counterparts transgressed racial boundaries, settling in historically white communities. Ultimately, Wiese explores how the civil rights movement emboldened black families to purchase homes in the suburbs with increased vigor, and how the passage of civil rights legislation helped pave the way for today's black middle class. Tracing the precise contours of black migration to the suburbs over the course of the whole last century and across the entire United States, *Places of Their Own* will be a foundational book for anyone interested in the African American experience or the role of race and class in the making of America's suburbs.
