Philips - TV parts

Step 1: A Little Bit of Background In LCD monitor power supplies, the capacitors will occasionally go bad. This causes them to leak and bulge out and the power supply will not be able to provide power to the monitor, causing it to not even turn on. So yeah, this is quite a problem if you want the monitor to work.

LCD TV power supply repair - Learn from my mistakes - YouTube

Here is a Parts Store for LCD TV Parts. TV Power Supply: The power board converts the ac line voltage which is 110 volts AC to lower voltages that are required for the operation of the television, very important is the stand by 5 volts needed by the microprocessor to stay wake so when it receives a command such as power on to turn on the power supply, then the power supply generates the secondary voltages needed which can vary by television, some are 12 to 18 volts needed by the audio ...

LG - LED TV Power Supply (PSU) Spare Parts & Accessories ...

Apparently, Samsung's power supply on several LCD models was somewhat under-designed, with four capacitors that slowly fail over time and which leads to the symptoms in the title. There are several options for repair: 1) Take the set to a qualified repair shop (est \$300 - \$500). 2) Buy a new, replacement, power supply (\$100 - \$175).
