Engineering with Redstone. If you want to get as advanced as possible in Minecraft, redstone is where it's at. Doors that automatically open, switch-controlled lights, farms that harvest themselves - it's all possible with redstone. The easiest way to think about redstone is in terms of electrical devices. Redstone components like levers are just like switches on real-world devices and redstone dust is laid down in the game like electrical wiring.

Minecraft Pocket Edition features redstone: the blocky world-building game's equivalent to electricity that allows you to wire up powered devices. With a little redstone (and a few other materials) you can create a lever that turns on a light. Or a button that switches a minecart track. Or a pressure plate that opens a trap door.

When making large redstone circuits, always make sure that you have enough repeaters. Redstone signals run out after 15 blocks so if you create a long trail of dust, you need to add a repeater every 15 blocks. However, if your circuit uses complex timing, you will need to concentrate on making all the timings line up.

In Minecraft, several in-game systems can usefully perform information processing. The systems include water, sand, minecarts, pistons, and redstone. Of all these systems, only redstone was specifically added for its ability to manipulate information, in the form of redstone signals. Redstone, like electricity, has high reliability and high switching-speeds, which has seen it overtake the other mechanical systems as the high-tech of Minecraft, just as electricity overtook the various ...
