Network Programming with Perl: Lincoln, Stein: Amazon.nl

Perl's ioctl () function is similar to fcntl () (Chapter 13), accepting a previously opened filehandle as the first argument, an integer constant corresponding to the command to perform as the second, and an operand to pass or receive data from the operation. The format of the operand depends on the operation.

A Traveesty Server | Network Programming with Perl

That's why Lincoln Stein's Network Programming with Perl is valuable. It shows how one of the world's top Perl authorities brings the language to bear on problems that require communication among computers, showing that you may not have to resort to Java as soon as you may have thought to meet a networking requirement.
