Database Resident Connection Pooling is a new feature of Oracle Database 11g. It is useful for short lived scripts such as typically used by web applications. It allows the number of connections to be scaled as web site usage grows. It allows multiple Apache processes on multiple machines to share a small pool of database server processes.

Using PHP with Oracle Database 11g

The PHP File. The page on the server called by the JavaScript above is a PHP file called "getuser.php". The source code in "getuser.php" runs a query against a MySQL database, and returns the result in an HTML table:
