Human – Computer
Interaction.

Human – Computer

Online Library Research

Interaction (HCI) draws on the fields of computer science, psychology, cognitive science, and organisational and social sciences in order to understand how people use and experience interactive technology. Until now, researchers have been forced to return to the individual subjects to learn about research

Human-Computer
Interaction ...

Humans are
information processors:
Information processing
in humans resembles
that in computers, and is
based on based on
transforming
information, storing
information and
retrieving information

Online Library Research

from memory.

Information processing models of cognitive processes such as memory and attention assume that mental processes follow a clear sequence.

Cognitive Approach |
Simply Psychology
Research methods are
specific procedures for

Online Library Research

collecting and analyzing data. Developing your research methods is an integral part of your research design. When planning your methods, there are two key decisions you will make. First, decide how you will collect data.

Online Library Research

Examples In

'Research Methods for Human-Computer Interaction is a wonderful resource for both students and practitioners who need to take a scientific approach to the design of user interfaces. It provides thorough introductions to many important topics.
