"Choosing Addiction Treatments: Validation of the American Society of Addiction Medicine (ASAM) Criteria focuses on the state-of-the-art in the addictions placement matching. This book examines the ASAM Patient Placement Criteria (PPC) which promises a national standard to settle the conflict between treatment programs and managed care. The research in this book has led 30 states to endorse the ASAM Criteria. This timely resource will help providers, insurers, and payers work together to provide effective treatment for people with alcohol and drug problems."

Pre-order today the new edition of the most widely used and comprehensive set of guidelines for placement, continued stay and transfer/discharge of patients with addiction disorders. The ASAM Criteria has been completely redesigned and updated to apply the newest science in the field of addiction medicine, is compliant with the DSM-5 and incorporates a user-friendly functionality. The ASAM criteria are the most intensively studied set of addiction placement criteria, having undergone numerous evaluations and studies of effectiveness. Research shows that treatment based on the ASAM criteria is associated with less morbidity, better client function and more efficient service utilization than mismatched treatment. The criteria are required in over 30 states and provide the addiction field with nomenclature for describing the continuum of addiction services. The ASAM Criteria is your resource in providing timely, appropriate, and effective care through a holistic and multidimensional approach that matches patient needs to specific treatment services.

Almost 40 percent of people living in the United States have an addiction to alcohol, drugs, or some form of tobacco. These addictions cost Americans hundreds of billions of dollars every year. Clearly, addiction is an enormous problem. Addiction in America: Society, Psychology, and Heredity takes a look at what leads people to a life of addiction—the social, psychological, and hereditary factors that might make an individual susceptible to addiction. This book provides you with an overview of one of the most serious problems facing American society today.

"If anyone you know is struggling with addiction—or if you think you might have a problem—you want to read this book."—GARTH STEIN, bestselling author of The Art of Racing in the Rain "a proven, comprehensive program that compassionately guides the reader to a place of resolution"—DAVID PERLMUTTER, MD, #1 New York Times bestselling author of Grain Brain, and, Brain Maker "a massive achievement and a giant step forward for addiction medicine"—ANNIE GRACE, author of This Naked Mind Opiate addiction is the single greatest public health crisis facing Americans—it affects over 2 million people and kills 115 of them every single day. Drug overdose is now the leading cause of death for Americans under fifty. Even as opiate addiction skyrocketed, more people than ever before are hooked on alcohol, sedatives, cigarettes, and even screens. The face and prevalence of addiction has changed and evolved, but our solutions to addiction are stuck in the past. We’ve been treating addiction as a black or white issue, a disease you either suffer from or will never suffer from. The problem with this model is that it doesn’t account for the incredible forces working against all of us, pushing all of us toward addiction: stress, undernourishment, sleep-deprivation, vitamin D deficiency, and isolation, not to mention a flawed medical system and corrupt pharmaceutical companies doling out prescriptions at every turn. The truth: Addiction is a disease that, like many others, exists on a spectrum. We are more vulnerable to becoming addicted to substances at certain points in our lives and based on the evidence provided in The Addiction Spectrum, most effective at kicking addiction when we take a holistic approach. With the help of the 13-point plan and individual protocols detailed in this book, you have the power to change your destiny. No one understands this more than Dr. Paul Thomas, who recovered from alcohol addiction early in his career and founded one of the most effective rehabilitation centers for teens and young adults in his hometown of Portland, OR. Named one of the top family doctors and one of the top pediatricians in the country, Dr. Paul is also board-certified in both integrative medicine and addiction medicine. This unique combination of specialties is intentional: Dr. Paul has devoted his entire life and career to saving lives. Using the best conventional medicine alongside the new science of alternative health, Dr. Paul has treated thousands of patients with the life-saving solutions provided in The Addiction Spectrum. Addiction is a compendium of often devastating circumstances that have gone unchecked by society for far too long. This book is a positive light and guide to overcoming not only addiction but the challenges and obstacles that affect us all.
